

Business Requirements Document (BRD)

Real Estate Performance & Lead Conversion Analysis

Document Control

- Prepared by: Rehmat Kaur
- Project Sponsor(simulated): Horizon Realty Group — Sales Operations
- Status: Draft v1.0
- Data note: Built on a synthetic dataset (1,800 leads, 15 agents), created for a portfolio application; not live production data.

1.Purpose

This document defines the business requirements for a Lead Conversion Funnel and Agent Performance reporting solution. The goal is to give sales leadership clear, self-serve visibility into how leads move through the funnel and how individual agents perform, replacing ad hoc, manually compiled reporting.

2.Business Objectives

- Give the Sales Manager a single view of funnel health (lead volume, conversion rate by stage) without manual spreadsheet compilation.
- Identify which lead sources convert best, to inform where marketing spend is allocated.
- Identify top- and low-performing agents by conversion rate, to guide coaching and lead-routing decision

3.Scope

In Scope

- Funnel overview: lead volume and conversion rate at each funnel stage.
- Conversion-by-source breakdown (e.g. referral, website, cold call, open house).
- Agent leaderboard ranked by conversion rate and closed deals.

Out of Scope

- Live/real-time data integration (addressed separately in the End-to-End Sales Performance Pipeline project).
- Commission or payroll calculations.
- Lead-level PII or contact management (CRM functionality).

4.Stakeholders

- Sales Manager — primary consumer of the funnel and leaderboard views; uses it for coaching and lead-routing decisions.
- Marketing Team — consumer of the conversion-by-source view; uses it to evaluate channel spend.
- Individual Agents — secondary consumers; view their own standing on the leaderboard.

5.Functional Requirements

ID	Requirements	Priority	Acceptance Criteria
FR-1	System shall display total leads, total conversions, and overall conversion rate as summary KPI cards.	High	Given the dataset is loaded, when the Overview page renders, then all three KPI cards display values consistent with the underlying SQL aggregation.
FR-2	System shall break down conversion rate by lead source in a chart.	High	Given a lead source filter is not applied, when the Overview page renders, then the chart shows every distinct source with its conversion rate, sorted highest to lowest.
FR-3	System shall rank all 15 agents by conversion rate on a Leaderboard page.	High	Given the Leaderboard page is open, when no filters are applied, then all agents appear ranked by conversion rate descending, with ties broken by total closed deals.
FR-4	System shall allow filtering the Leaderboard by a date range.	Medium	Given a date range is selected, when the filter is applied, then the leaderboard recalculates conversion

ID	Requirements	Priority	Acceptance Criteria
			rate using only leads created within that range.
FR-5	System shall display each agent's total leads assigned alongside their conversion rate, so low volume outliers are visible.	Medium	Given the Leaderboard page, when viewing any agent row, then both 'leads assigned' and 'conversion rate' are visible in the same row.

6.Non-Functional Requirements

- Usability: Dashboard must be interpretable by a non-technical Sales Manager without a walkthrough (clear labels, no raw SQL/table views on the main pages).
- Performance: Dashboard pages should load in under 3 seconds against the 1,800-row dataset.
- Maintainability: Underlying SQL queries should be documented so the data model can later be pointed at a live source.

7.Assumptions & Constraints

- Dataset is synthetic and static; no live CRM feed exists for this phase.
- Power BI Desktop is the reporting tool; no server-based refresh schedule is required for this phase.
- 15 agents and their lead assignments are fixed for the duration of this analysis.

8.Acceptance Sign-off Criteria

This phase is considered complete when: the Overview page (FR-1, FR-2) and Agent Leaderboard page (FR-3, FR-4, FR-5) are built, all acceptance criteria above pass, and the Sales Manager persona can answer "which source converts best" and "who are my top 3 agents this month" without assistance.
